- THICKER SCREEN FOR LONGER LIFETIME
- M2K & M2S OFFER REFURBISHING PROGRAM
- LIFETIME 3 – 5 YEARS
- RELIABLE IGNITION & DETECTION EMITTERS

Marsden continues to improve the M2 replacement emitter product line to promote better fuel efficiency, enhanced uniformity of the firing face, and now even longer lifetime through a more rugged and longer lasting reverberatory screen.

Marsden offers a better and more innovative gas IR replacement emitter. Marsden's service team provides a "CAREFREE" and cost-effective repair & maintenance program from simply replacing emitters, to troubleshooting the combustion support equipment, as well as handling ignition & control challenges to keep your system running reliably and as productive as possible.

Marsden invested significant resources to maintain it's leadership-position in process heating technology. These efforts resulted in being able to offer customers a solid 40-50% savings through Marsden's refurbishment program.

Please contact Marsden for more information on how to enroll in Marsden's refurbishment program and ask for:
