Refurbishing Program

ENROLL FOR FREE & SAVE UP TO 40%

Buy a new row of M2 emitters and save up to 40% the second time around!

Economically priced • Rugged design for longer lifetime
Lifetime 3 - 5 years • Reliable ignition & detection emitters

Marsden continues to improve the M2 replacement emitter product line to promote better fuel efficiency, enhanced uniformity of the firing face, and now even longer lifetime through a more rugged and longer lasting reverberatory screen.

Marsden's service team provides a "CAREFREE and cost-effective repair & maintenance program from simply replacing emitters, to troubleshooting the combustion support equipment, as well as handling ignition & control challenges to keep your system running reliably and as productive as possible.

Marsden invested significant resources to maintain its leadership-position in process heating technology. These efforts resulted in being able to offer customers a solid 40-50% savings through Marsden's refurbishment program.

Please contact Marsden for more information on how to enroll in Marsden's refurbishment program and ask for:
